Get a Track

Get Spotify catalog information for a single track identified by its unique Spotify ID.

Endpoint

```
GET https://api.spotify.com/v1/tracks/{id}
```

Request Parameters

PATH ELEMENT	VALUE
id	The Spotify ID (/web-api/user-guide/#spotify-uris-and-ids) for the track.

QUERY PARAMETER	VALUE
market	<i>Optional.</i> An ISO 3166-1 alpha-2 country (http://en.wikipedia.org/wiki/ISO_3166-1). Provide this parameter if you want to app Relinking (https://developer.spotify.com/web-api/track-relinking-guide/).

Response Format

On success, the HTTP status code in the response header is **200** OK and the response body contains a track object (/web-api/object-model/#track-object) in JSON format. On error, the header status code is an error code (/web-api/user-guide/#response-status-codes) and the response body contains an error object (/web-api/user-guide/#error-details).

Example Request

```
$ curl -X GET "https://api.spotify.com/v1/tracks/3n3Ppam7vgaVa1iaRUc9Lp"
```

iOS SDK (Beta)
(<https://developer.spotify.com/technologies/spotify-ios-sdk/>)

track object (full)

Android SDK (Beta) (https://developer.spotify.com/technologies/spotify-android-sdk/)	KEY	VALUE TYPE	VALUE DESC
Libspotify SDK (https://developer.spotify.com/technologies/spotify-libspotify/)	album	a simplified album object (/web-api/object-model/#album-object-simplified)	The album object includes information about the album
AppleScript API (https://developer.spotify.com/api/)	artists	an array of simplified artist objects (/web-api/object-model/#artist-object-simplified)	The artists object includes information about the artists
Support (https://developer.spotify.com/support/)	available_markets	array of strings	A list of the country codes of the markets in which the track is available, identified by ISO 3166-1 alpha-2 codes. (http://en.wikipedia.org/wiki/ISO_3166-1_alpha-2)
Design Resources (https://developer.spotify.com/design-resources/)			

Terms of Use
(<https://developer.spotify.com/de-terms-of-use/>)

KEY	VALUE TYPE	VALUE DESC
disc_number	integer	The disc number consists of number
duration_ms	integer	The track length in milliseconds
explicit	Boolean	Whether or not the track is explicit; if yes it does; if no it does not
external_ids	an external ID object (/web-api/object-model/#external-id-object)	Known external IDs for the track
external_urls	an external URL object (/web-api/object-model/#external-url-object)	Known external URLs for the track
href	string	A link to the details of the track
id	string	The Spotify ID of the track (https://developer.spotify.com/web-api/object-model/#track-object)
is_playable	boolean	Part of the re-linking guide (https://developer.spotify.com/web-api/object-model/#track-object) relinking-guide playable in the current market
linked_from	a linked track object (https://developer.spotify.com/web-api/object-model/#track-link)	Part of the re-linking guide (https://developer.spotify.com/web-api/object-model/#track-link) relinking-guide track has been linked to another track in the same album or playlist information about the linked track
name	string	The name of the track

KEY	VALUE TYPE	VALUE DESCRIPTION
popularity	integer	The popularity score of the track, between 0 and 100. A score of 100 means the track is the most popular in the most popular category.
preview_url	string	A link to a 30-second preview of the track. <code>null</code> if the track is not available for preview.
track_number	integer	The number of the track on the album, disc, or playlist, starting from 1.
type	string	The object type, which can be 'album', 'single', 'playlist', or 'track'.
uri	string	The Spotify URI for the track, which is used to identify the track in the Spotify API.
